- A) .tar
- B) .tar.gz
- C) .tar.zip
- D) .tar.x

☒ **Answer: B) .tar.gz**

5. Which command will list contents of a tar archive without extracting?

- A) tar -xvf
- B) tar -tvf
- C) tar -cvf
- D) tar -rvf

☒ **Answer: B) tar -tvf**

6. Which command is used to compress files into a ZIP archive?

- A) tar
- B) gzip
- C) zip
- D) unzip

☒ **Answer: C) zip**

7. Which option is required to zip an entire directory?

- A) -v
- B) -r
- C) -d
- D) -u

☒ **Answer: B) -r**

8. Which command is used to extract a zip file?

- A) unzip file.zip
- B) zip -x file.zip
- C) tar -xvf file.zip
- D) zip file.zip

 **Answer: A) unzip file.zip**

9. Which command displays detailed file information such as inode, permissions, and timestamps?

- A) ls
- B) stat
- C) file
- D) info

 **Answer: B) stat**

10. In the stat command, what does inode represent?

- A) File size
- B) File permission
- C) Unique identification number of file
- D) File type

 **Answer: C) Unique identification number of file**

11. Which command is used to search files and directories in Linux?

- A) grep
- B) find
- C) search
- D) locate

 **Answer: B) find**
