

Disk Management in Linux

Multiple Choice Questions (MCQs)

Instructions: Answer all questions. Each question carries **1 mark**.

Form Link: <https://forms.gle/P6BAcD7qWwJvzv7q6>

1. What is Linux Disk Management primarily used for?

- A. Managing network traffic
- B. Organizing and controlling storage devices
- C. Monitoring CPU performance
- D. Managing system users

Answer: B

2. Where are disk devices represented in Linux?

- A. /etc
- B. /home
- C. /dev
- D. /usr

Answer: C

3. Which command is used to list all block devices in Linux?

- A. lsblk
- B. mount
- C. ps
- D. top

Answer: A

4. What does the device name **/dev/sda** represent?

- A. First partition
- B. First disk
- C. Second disk
- D. Swap disk

Answer: B

5. Which command is used to display detailed disk partition information?

- A. lsblk
- B. df -h
- C. fdisk -l
- D. mount

Answer: C

6. Which step comes immediately after creating a partition?

- A. Mounting
- B. Formatting filesystem
- C. Reboot system
- D. Delete partition

Answer: B

7. Which command tells the kernel to re-read the partition table without rebooting?

- A. mkfs
- B. partprobe
- C. mount
- D. lsblk

Answer: B

8. Which command is used to create an EXT4 filesystem?

- A. mkfs.ext4
- B. fsck
- C. mount
- D. blkid

Answer: A

9. Which file is used for **permanent disk mounting in Linux**?

- A. /etc/passwd
- B. /etc/shadow
- C. /etc/fstab
- D. /etc/network

Answer: C

10. In the Linux storage architecture, which layer comes **after partitions**?

- A. Filesystem
- B. Physical disk
- C. User access
- D. Kernel driver

Answer: A

11. What is the maximum number of **primary partitions in MBR**?

- A. 2
- B. 4
- C. 8
- D. 16

Answer: B

12. Which partition type acts as a container for logical partitions?

- A. Primary partition
- B. Swap partition
- C. Extended partition
- D. Boot partition

Answer: C

13. Logical partitions start numbering from:

- A. 1
- B. 2
- C. 4
- D. 5

Answer: D

14. Which partition table type supports disks larger than **2TB**?

- A. MBR
- B. GPT
- C. FAT
- D. EXT4

Answer: B

15. What does **MBR** stand for?

- A. Master Boot Record
- B. Main Boot Resource
- C. Master Binary Registry
- D. Memory Boot Region

Answer: A

16. Which modern partition system replaces MBR?

- A. NTFS
- B. FAT32
- C. GPT
- D. EXT3

Answer: C

17. Which filesystem is the **default in most modern Linux distributions**?

- A. ext2
- B. ext3
- C. ext4
- D. FAT32

Answer: C

18. Which filesystem is designed for **high-performance enterprise servers**?

- A. ext2
- B. xfs
- C. vfat
- D. swap

Answer: B

19. Which command is used to mount a partition temporarily?

- A. mount
- B. umount
- C. fdisk
- D. blkid

Answer: A

20. What is the purpose of **swap space** in Linux?

- A. Backup storage
- B. Virtual memory when RAM is full
- C. Boot storage
- D. User storage

Answer: B
